## Precalculus Section 5.3 Exercises

Solve the following equations.

1. $x-4=1+\sqrt{2 x-3}$
2. $\sqrt{x-5}+\sqrt{x-10}=5$ (Hint: rearrange to get something nicer before squaring both sides.)
3. $3-(4 x+15)^{2 / 3}=-6$
4. Do problem 38(a) on page 408 of Stitz-Zeager, but assume instead that the air temperature today is $10^{\circ} \mathrm{F}$ and the wind is a steady 15 miles per hour. What is the wind chill?
Suppose instead that the wind chill is $0^{\circ} \mathrm{F}$ and today's temperature is $10^{\circ} \mathrm{F}$. What is the wind speed?
